Admin: card activity	Done	Recent payments for the card listed.
Access control	Done	Non-admin gets 403 Forbidden.
Admin actions logged	Done	Rows saved in admin_logs table.
Docker setup	Done	db, mailpit, django, fastapi, frontend running.

Evidence

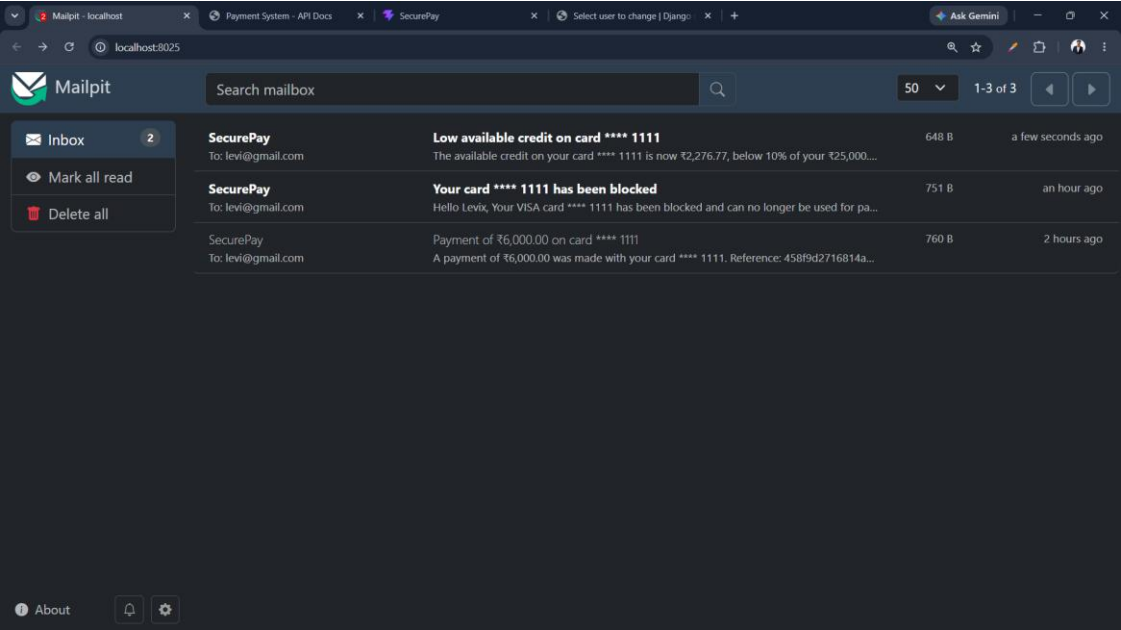

Email Alerts — Mailpit Empty Before Test

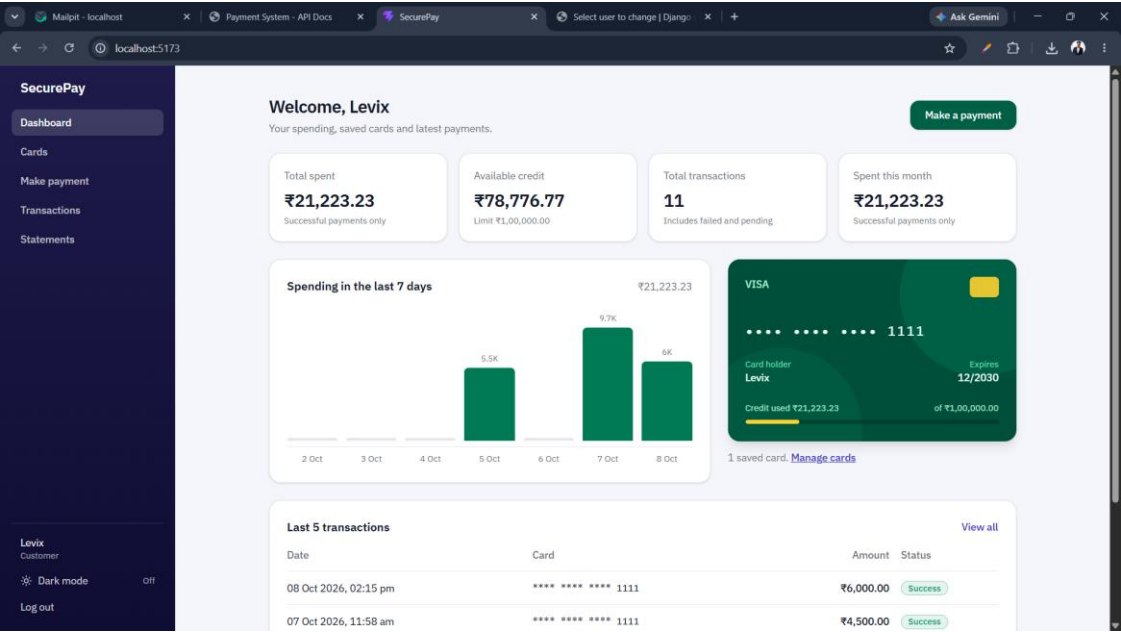

Email Alerts — ₹6,000 Payment (Over ₹5,000)

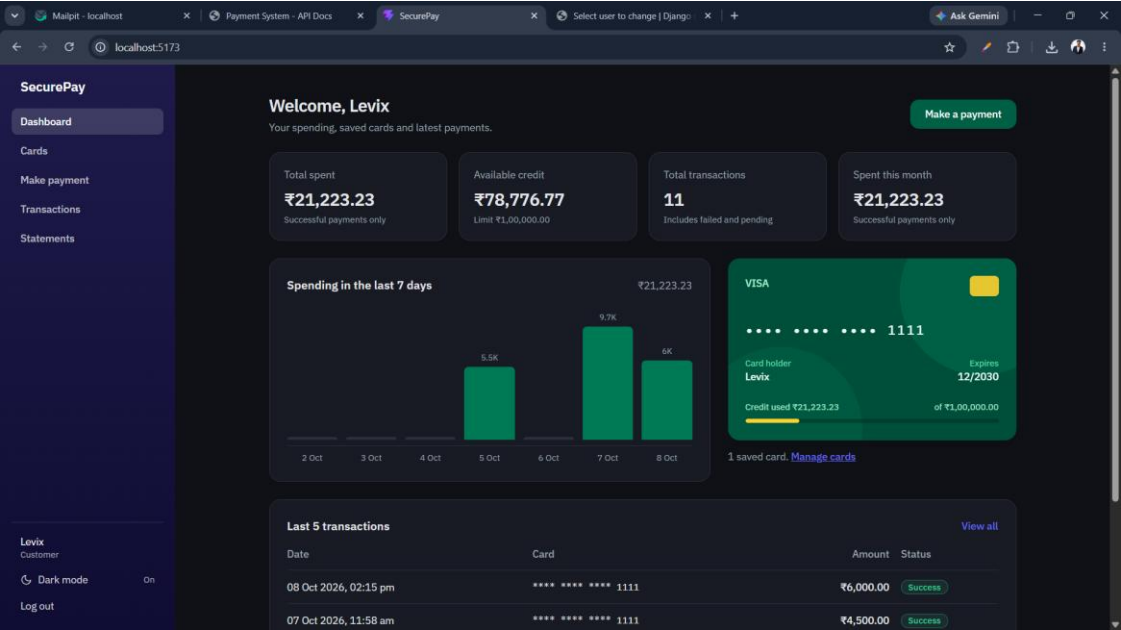

Email Alerts — Payment, Card Blocked and Low Credit Emails

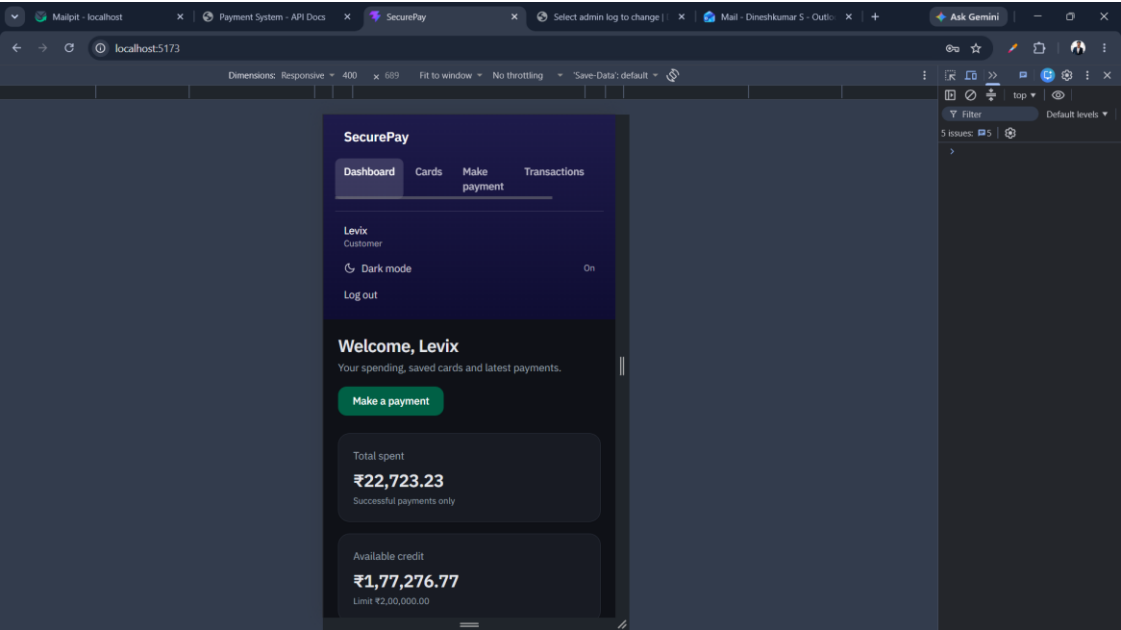

Dark Mode — Light Dashboard

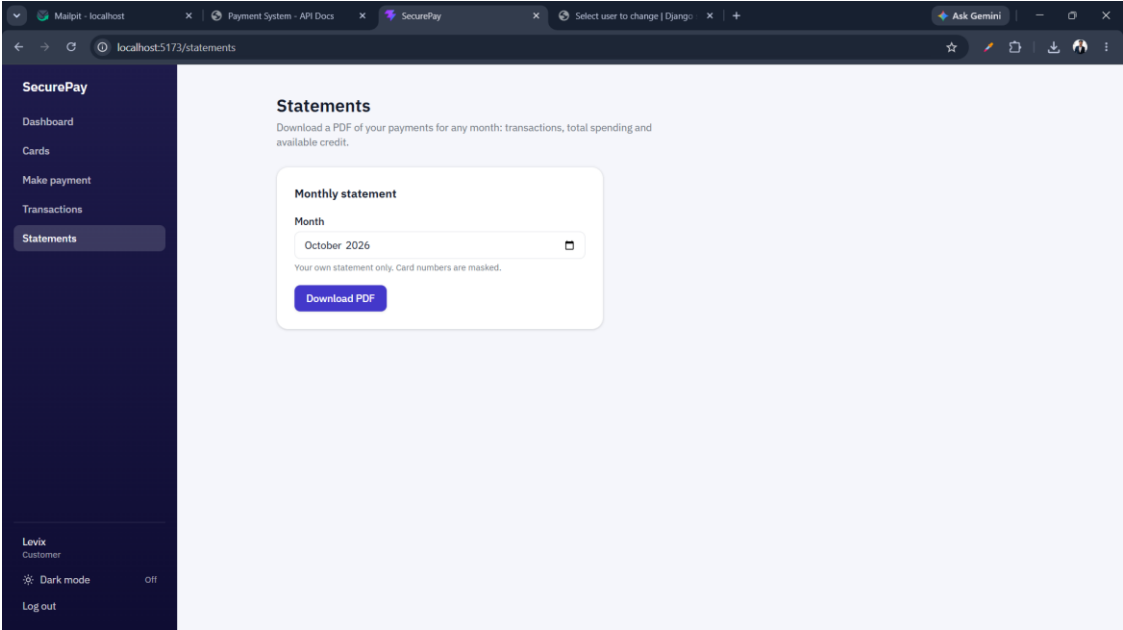

Dark Mode — Dark Dashboard

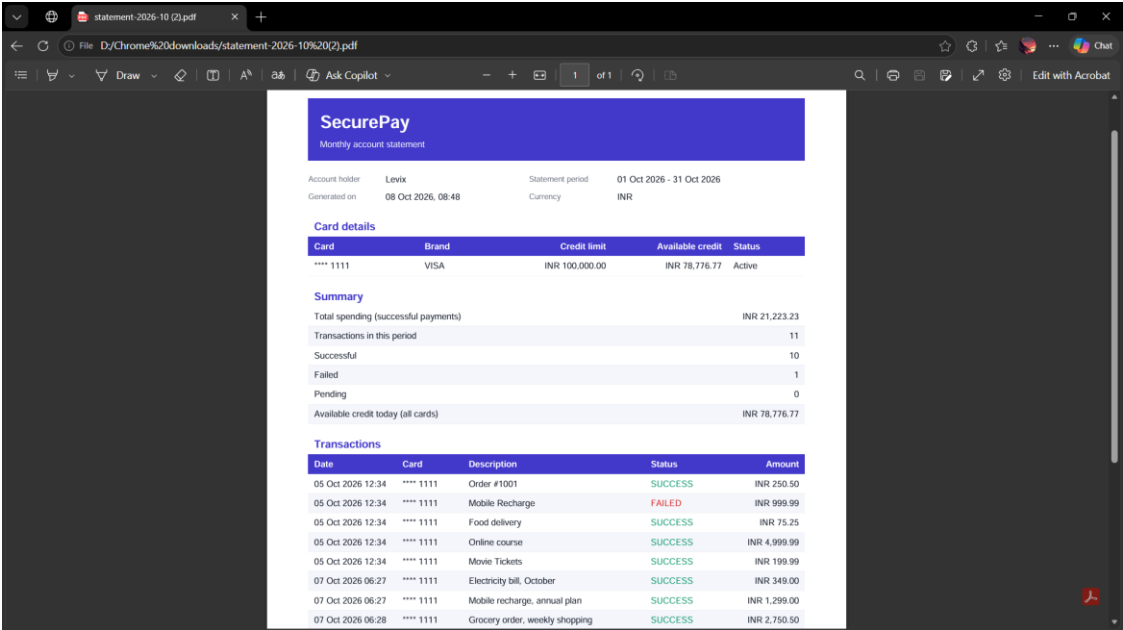

Dark Mode — Phone Width (400px)

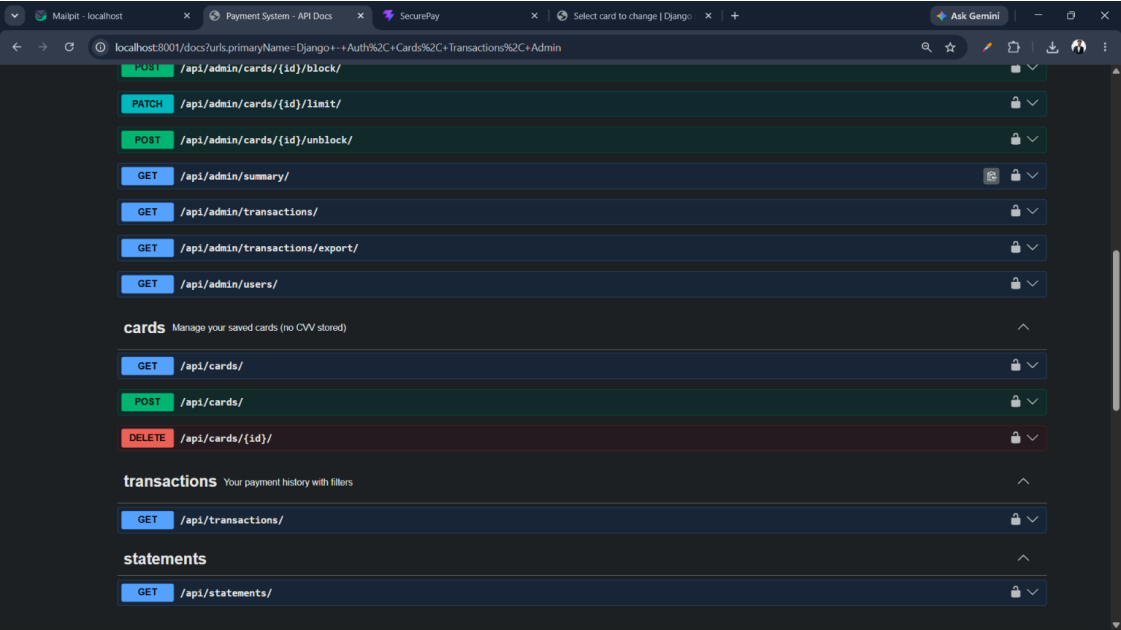

Statement PDF — Statements Page

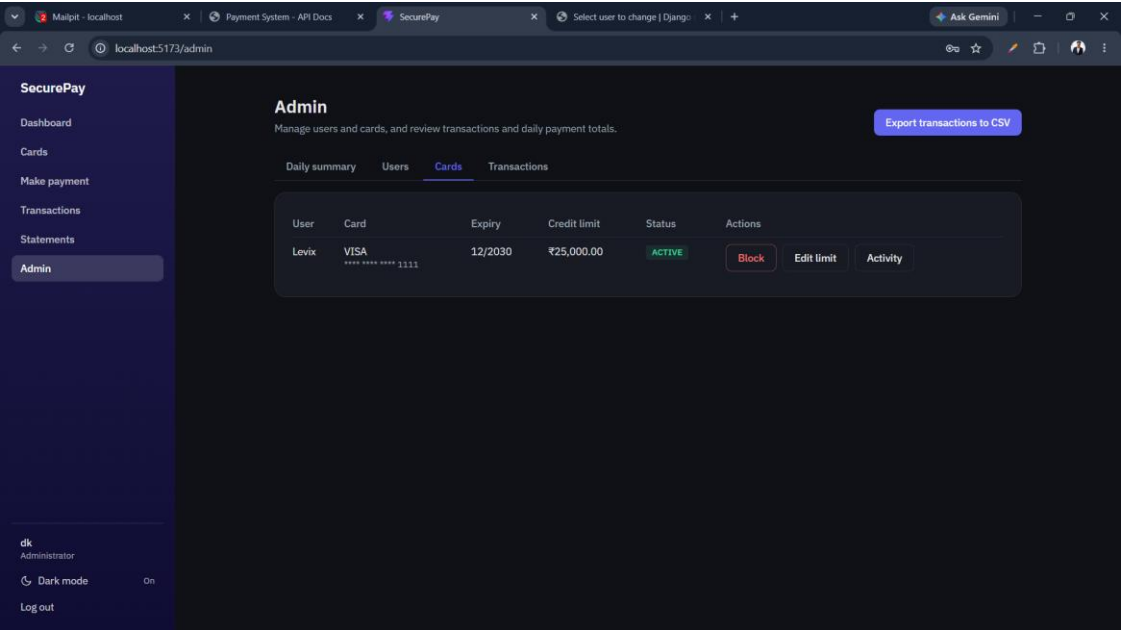

Statement PDF — Generated Statement

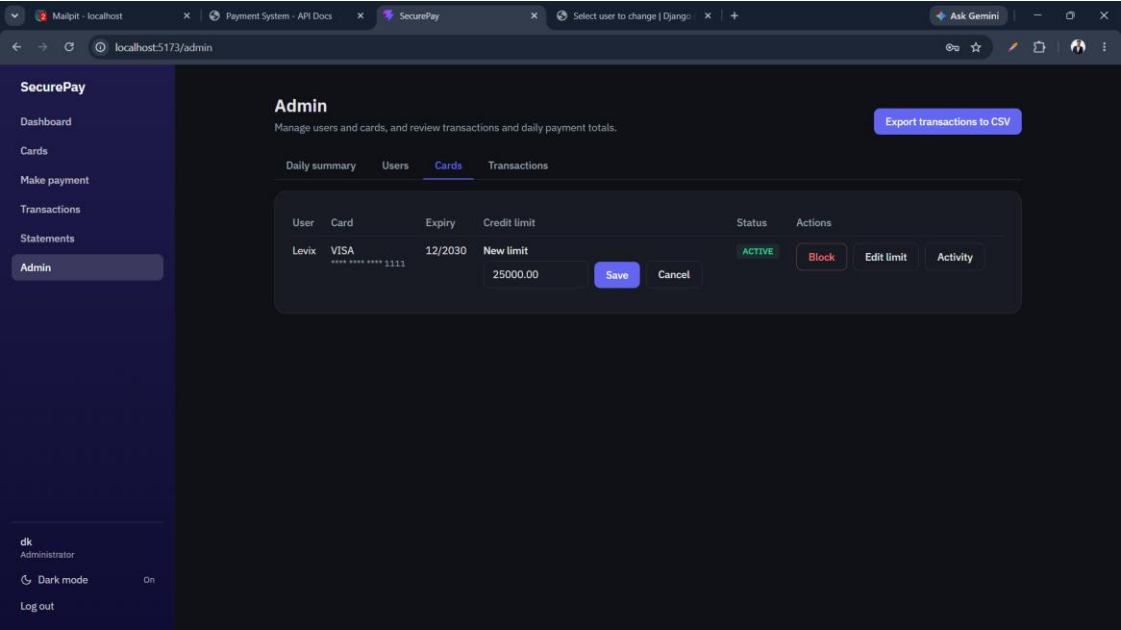

Admin Panel — Card Endpoints in Swagger

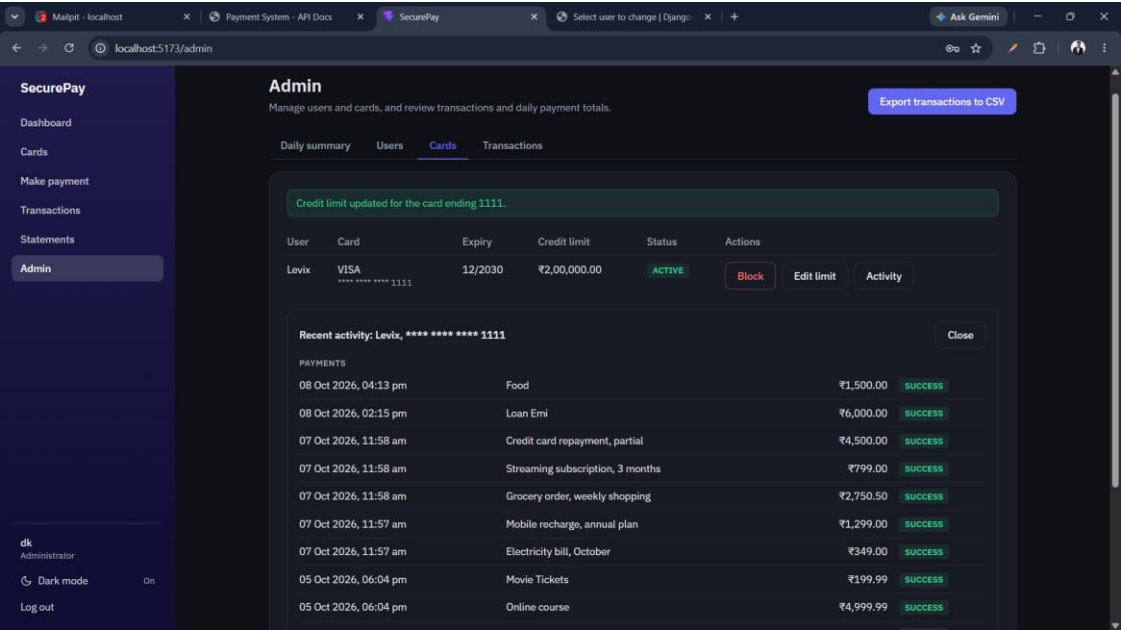

Admin Panel — All Cards Table

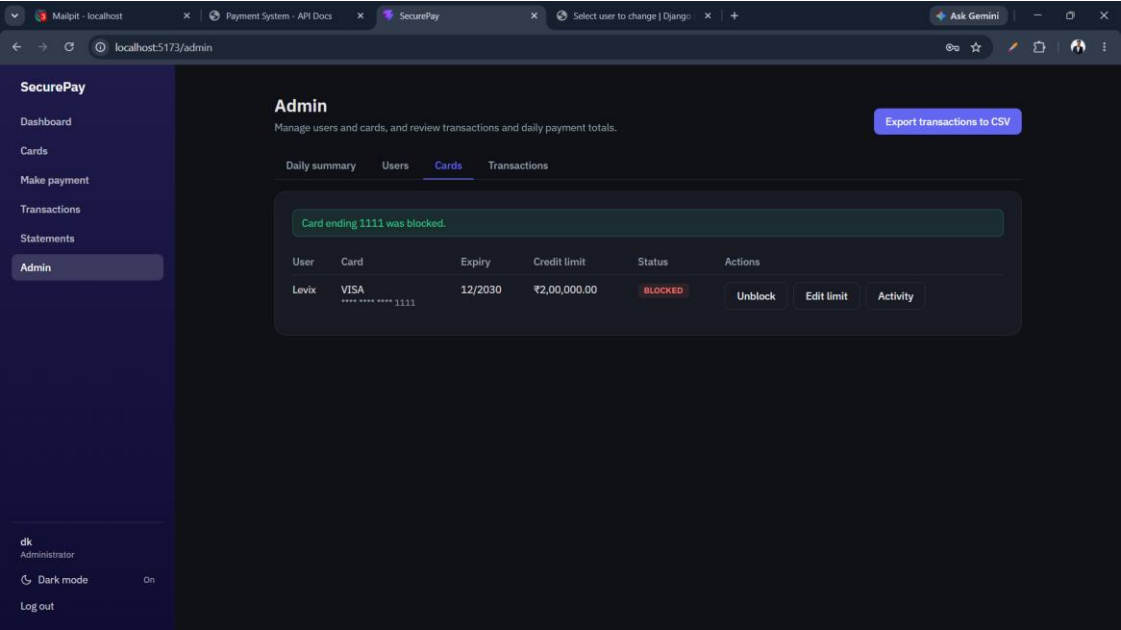

Admin Panel — Edit Credit Limit

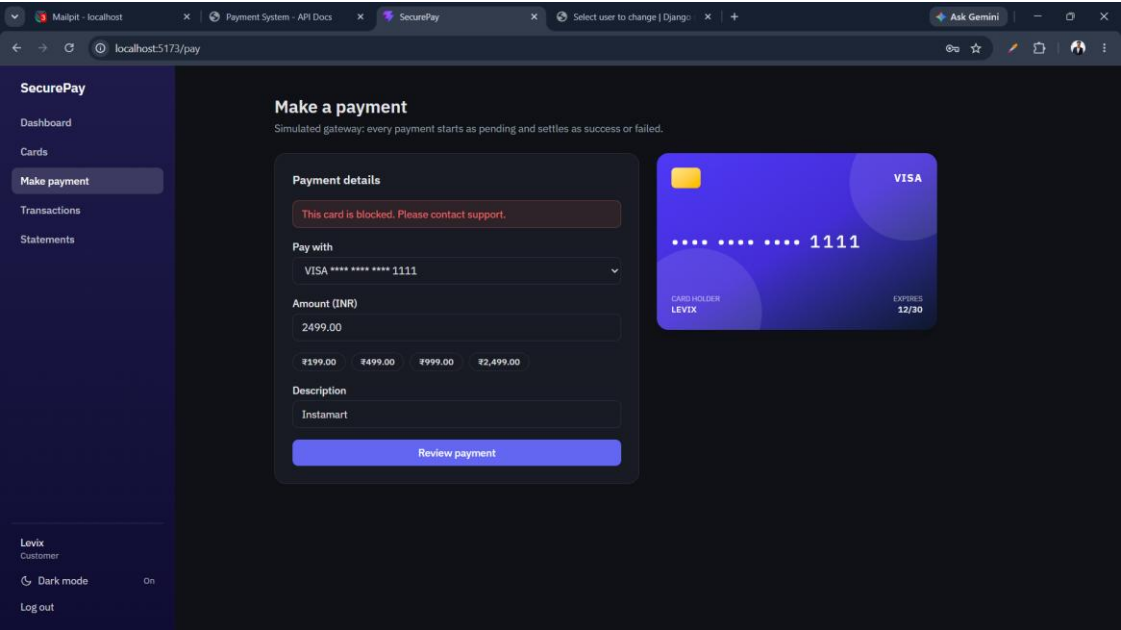

Admin Panel — Limit Updated and Card Activity

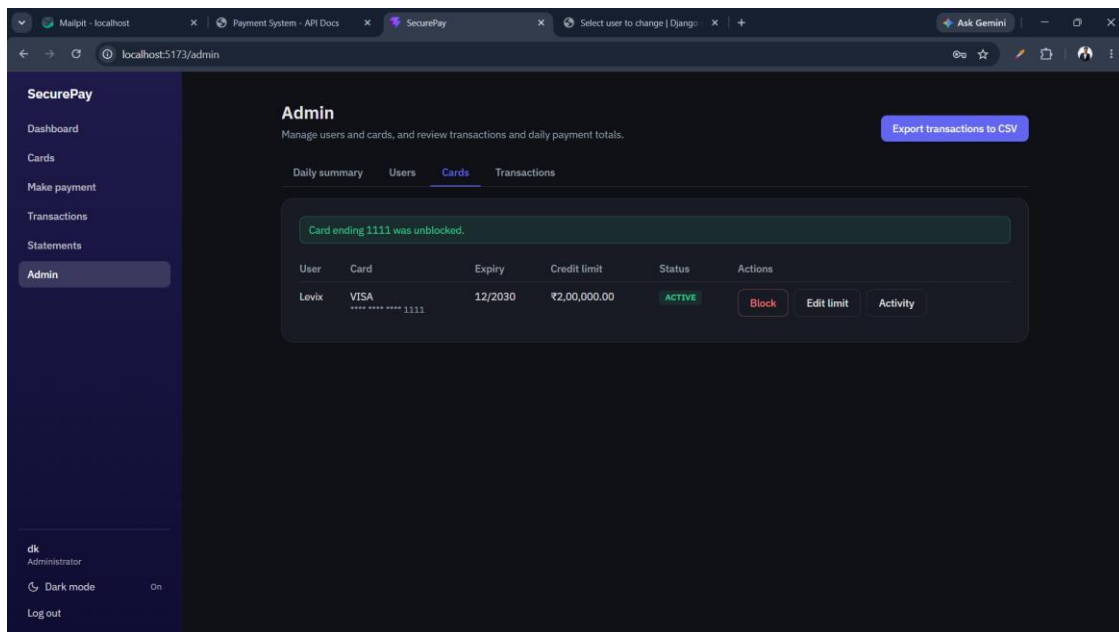

Admin Panel — Card Blocked

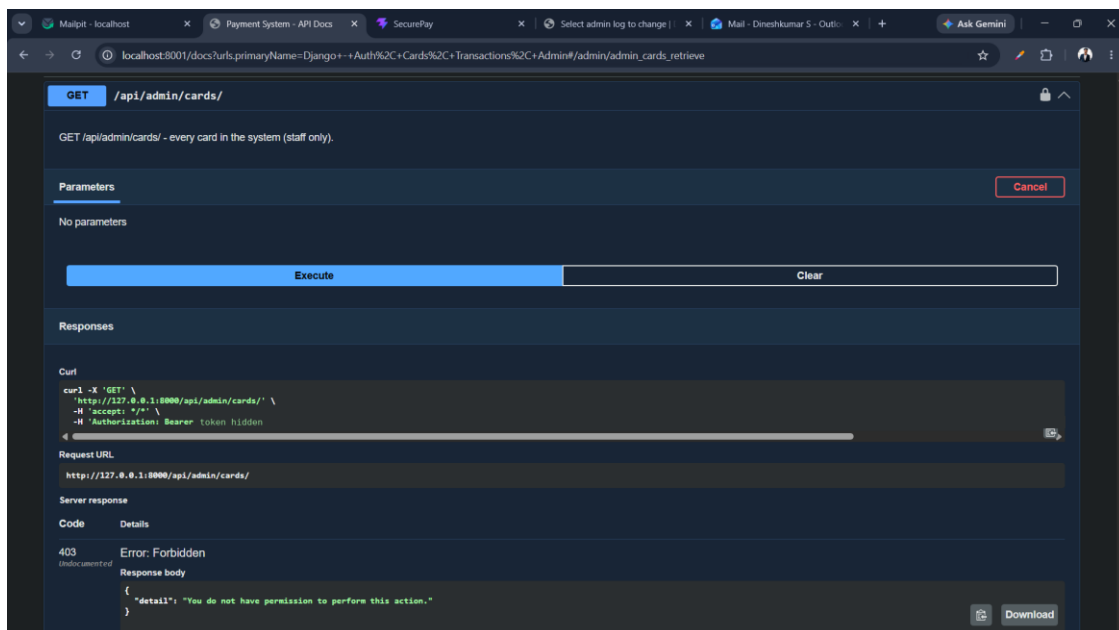

Admin Panel — Payment Rejected on Blocked Card

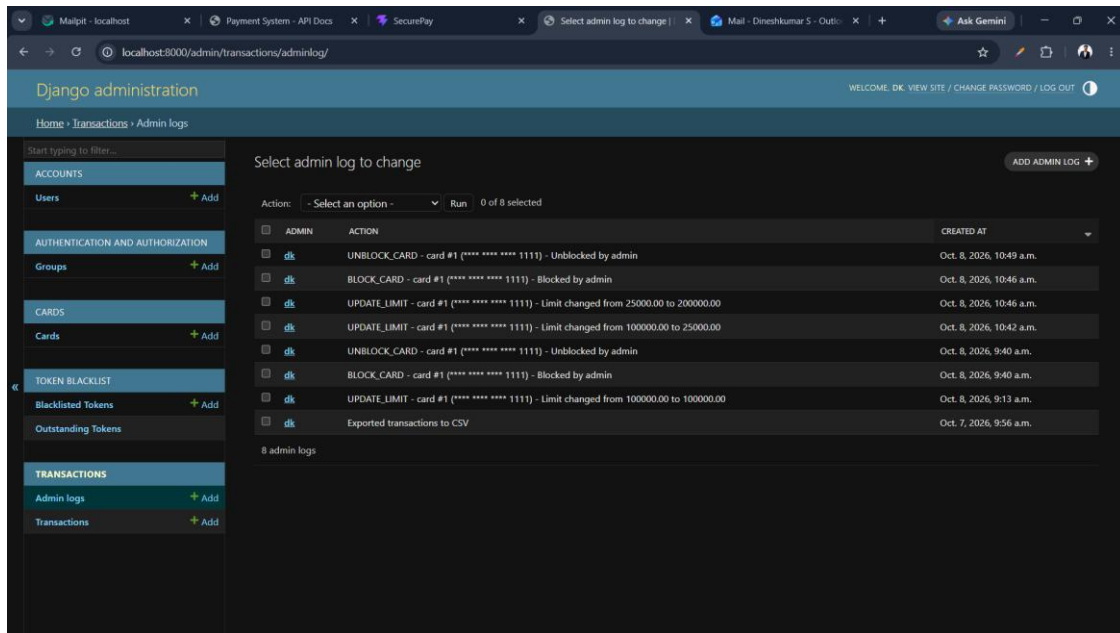

Admin Panel — Card Unblocked

Access Control — Normal User Gets 403

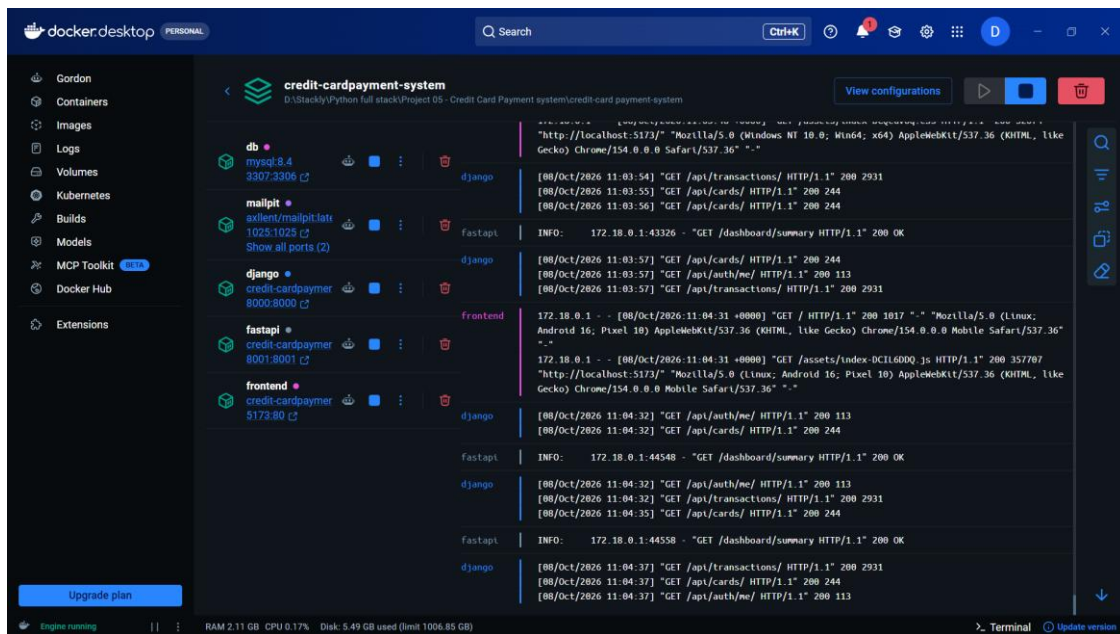

Admin Logs — Actions Saved in admin_logs Table

The screenshot shows the Django Admin interface for a system named "credit-cardpayment-system". The left sidebar contains a menu with categories: ACCOUNTS (Users), AUTHENTICATION AND AUTHORIZATION (Groups), CARDS (Cards), TOKEN BLACKLIST (Blacklisted Tokens, Outstanding Tokens), and TRANSACTIONS (Admin logs, Transactions). The main content area is titled "Select admin log to change" and displays a table of 8 admin logs. The table has columns for ACTION and CREATED AT. The actions listed are: UNBLOCK_CARD - card #1 (**** * 1111) - Unblocked by admin, BLOCK_CARD - card #1 (**** * 1111) - Blocked by admin, UPDATE_LIMIT - card #1 (**** * 1111) - Limit changed from 25000.00 to 200000.00, and Exported transactions to CSV. The dates range from Oct. 8, 2026, 10:49 a.m. to Oct. 7, 2026, 9:56 a.m.

ACTION	CREATED AT
UNBLOCK_CARD - card #1 (**** * 1111) - Unblocked by admin	Oct. 8, 2026, 10:49 a.m.
BLOCK_CARD - card #1 (**** * 1111) - Blocked by admin	Oct. 8, 2026, 10:46 a.m.
UPDATE_LIMIT - card #1 (**** * 1111) - Limit changed from 25000.00 to 200000.00	Oct. 8, 2026, 10:46 a.m.
UPDATE_LIMIT - card #1 (**** * 1111) - Limit changed from 100000.00 to 25000.00	Oct. 8, 2026, 10:42 a.m.
UNBLOCK_CARD - card #1 (**** * 1111) - Unblocked by admin	Oct. 8, 2026, 9:40 a.m.
BLOCK_CARD - card #1 (**** * 1111) - Blocked by admin	Oct. 8, 2026, 9:40 a.m.
UPDATE_LIMIT - card #1 (**** * 1111) - Limit changed from 100000.00 to 100000.00	Oct. 8, 2026, 9:13 a.m.
Exported transactions to CSV	Oct. 7, 2026, 9:56 a.m.

Docker — All Services Running

The screenshot shows the Docker Desktop interface for a "credit-cardpayment-system". The left sidebar contains a menu with categories: Containers, Images, Logs, Volumes, Kubernetes, Builds, Models, MCP Toolkit, Docker Hub, and Extensions. The main content area displays a list of running containers. The containers are: db (mysql:8.4), mailpit (axllent/mailpit:latest), django (credit-cardpayer:8000/8000), fastapi (credit-cardpayer:8001/8001), and frontend (credit-cardpayer:5173/80). The right panel shows the logs for the selected container, which are the django container. The logs show various HTTP requests and responses, including GET /api/transactions/, GET /api/cards/, GET /api/auth/me/, and GET /api/transactions/.

Container Name	Image	Status
db	mysql:8.4	Running
mailpit	axllent/mailpit:latest	Running
django	credit-cardpayer:8000/8000	Running
fastapi	credit-cardpayer:8001/8001	Running
frontend	credit-cardpayer:5173/80	Running
